## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Claim Rejections - 35 USC § 112***

2. Claims 9 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. This claim is an omnibus type claim.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 and 10-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Hjordie (U.S. 4,966,302). Hjordie teaches an arrangement comprising an open-ended container 1 and closure 2 therefor. The container comprises at least one projection 5 extending completely around its outer surface adjacent the rim 10 of its open, upper end. The closure 2 comprises a cover, at 9 and 16 shown in figures 1, 2 and 4, for extending over the open upper end and a skirt also shown in figures 1, 2 and 4 depending from element 9 of the cover. The skirt has an upper portion shown at lead line 6 in figure 2 and a lower portion at 3. The lower portion of the skirt may be flipped between a raised configuration, shown in figure 1, for mounting and removal of the cover on the container and a lowered configuration, shown in

Art Unit: 3781

figure 2, in which it engages with the projection of the container thereby to retain the cover on the container. The lower portion of the skirt is divided into at least two discrete peripheral sections, as shown in figure 4, that may be flipped between the raised and lowered configurations independently of each other. See col. 3 lines 45-49. The annular channel is shown at 9. The projection of the skirt is shown adjacent lead line 3 in figure 2

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the container and lid locking means.

6. THIS ACTION IS NON-FINAL.
